

FT 7951X

Avery Dennison FT 7951X is a 3.8 mil double coated scrim with a low VOC modified acrylic adhesive. It bonds well to low surface energy materials and has excellent foam bonding properties. FT 7951X is commonly used for general industrial foam bonding and where low VOC properties are required.

FEATURES:

- Reinforced adhesive
- · Low outgassing modified acrylic adhesive
- Polyester scrim reinforcement
- Glassine paper release liner

BENEFITS:

- · Conformability along with good die cutting performance
- Solvent free adhesive with excellent foam bonding performance
- Conformability and resistance to stretching with good converting performance
- Dimensional stability and excellent water jet and die cutting performance

CONSTRUCTION:

Liner: Havana Glassine Adhesive: Low VOC Acrylic Carrier: Scrim Adhesive: Low VOC Acrylic

APPLICATION TECHNIQUES

• It is essential, as with all pressure-sensitive tapes, that the surface to which the tape is applied be clean, dry, and free of grease or oil

Bond strength is dependent upon the amount of adhesive-to-surface contact developed

· Note that different pressure, time and temperature on different (film / rigid) surface achieves different performance

STORAGE / SHELF LIFE

• One year when stored at 64-72°F (18-22°C) / 30-70% relative humidity, out of direct sunlight and in original packaging.
